My name

Hello my name is Teddy. One day I started falling. This is a lot different from normal as normally I just see gray murky stuff. I am precipitation

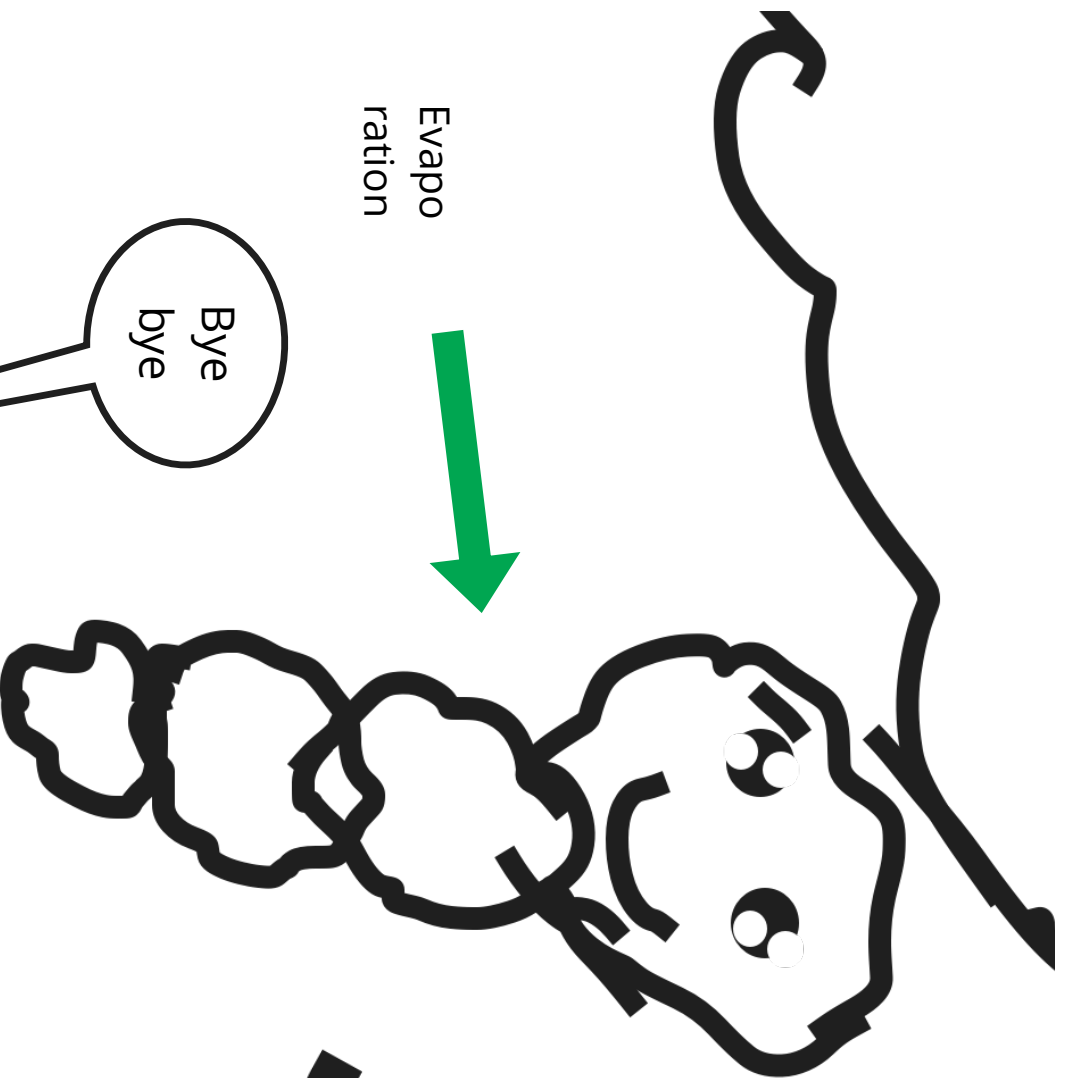

When I fell I landed on the ground. I infiltrated the ground and soaked into it. I stayed there for 3 years. Then I ran off into the ocean, where I met this dumb raindrop named Dave.

I stayed in the ocean  
for one million years  
but I finally got away  
from derpy Dave.

We've made teddy  
visible even though you  
can't really see  
evaporation

Bye  
bye

The sun heated me and  
I evaporated and  
turned into  
condensation. I've  
completed the water  
cycle.
